Subject: Microsoft Settlement

Gentlemen;

I am writing to briefly express my disapproval of the current outlined settlement with Microsoft in the current antitrust proceedings. The changes proposed are far too limited, and completely ignore the damage already done to the computer hardware and software markets, and the threat to the networked computing market that is presented by the current Microsoft organization and culture.

Please reconsider the idea of structural changes to Microsoft, or at least some form of strict, preemptive oversight; otherwise, we are all in for "Internet: a trademark of Microsoft, Inc".

Thank you for your attention.
